

eFileSalesTax.com Offers New Time-Saving Features for Large or Multi-Location Businesses in California

OXNARD, California - (July 20, 2010) - eFileSalesTax.com is a big favorite with small and medium sized businesses for filing their California Sales Tax returns, but now even large and multi-location business can take advantage of fast, easy, low-cost sales tax filing.

"Small businesses have always loved eFileSalesTax.com, but we started hearing from larger businesses that also wanted to use our sales tax filing software," said Ramon Rochin, CFO, eFileSalesTax.com. "We listened to their unique needs and came up with features like the ability to import multi-location data into Schedules A and C, which is a huge time-saver. Now, eFileSalesTax.com is perfect for companies of all sizes."

California businesses that have multiple locations, or sell in multiple tax districts, often have to file Sales Tax Schedules A and C. Manually filling in the information on these schedules may have taken days to complete in the past.

Now, that can be drastically reduced to a matter of minutes by importing sales data to Schedule A or C from a spreadsheet, when eFiling through eFileSalesTax.com.

The imports can be used to transport your data from your accounting program directly into the eFileSalesTax.com system. You can still edit and make changes after importing, and after you review it, you can submit your completed sales and use tax return to the Board of Equalization electronically in a matter of seconds.

To get started, go to www.eFileSalesTax.com and click on "Register". Pricing for California Sales Tax filing is only \$6.95 per filing, or \$199 per year for Unlimited filings. The software also supports sales tax filing for Florida and Illinois.

eFileSalesTax.com recently won the 2010 Readers' Choice award from CPA Technology Advisor in the sales tax category.
