Thousand Oaks, Calif. – (August 17,2006) – With so many difficulties to consider in regard to sales tax filing, the folks at www.efileSalesTax.com have made life easier for filing sales and use taxes. Whether you're one of the nearly one million eligible California businesses who can file electronically or must file using paper forms, efileSalesTax.com makes it easier than ever to file sales tax returns. Newer elements now allow business owners to focus on building the business rather than worrying about filing sales taxes. Elements like QuickBooks integration and updated 401EZ and 401A sales tax forms makes filing faster and easier. As the largest processor of electronically filed sales and use tax returns in California, the system is also available in Spanish. The sophisticated system is simple to use and very cost efficient at only \$4.95 per filing, with no software to purchase or download.

For those not eligible to submit their sales taxes electronically, efileSalesTax.com now allows taxpayers to use the efile system to calculate the taxes, followed by the system generating a state approved official paper tax form, ready to be printed, signed, and mailed. Nothing could be simpler. This service is integrated into the efileSalesTax.com system, or can be found at paperFileSalesTax.com
